Company Profile

FYM Logic, Inc. has been servicing clients in the electrical contracting field since 2002. The company was founded by Yolanda M. Mitchell and has been recognized on several occasions for our excellence and responsiveness to our client needs. Since FYM Logic, Inc. was founded, we have supported clients in the private and public sectors.

FYM Logic, Inc. has the experience and resources to support most electrical contracting projects. Our capabilities: include design analysis; construction management; construction implementation and oversight; quality assurance/quality control; contract administration and project closeout.

Our mission is a commitment to excellence. We will gain and retain your business by continually improving the quality of our service and performing in a manner warranting the highest degree of confidence in our integrity, efficiency, and fairness.

People are our most important asset. Our people are professionals who deliver quality installations and service. We pride ourselves on exceeding our client's expectations. We know that our clients are our best references and the most affordable form of advertising.

In today's business environment, the reality is; tighter budgets, limited technical resources, and reduced staff, we can help. We make it our business to understand our client's goals and to seamlessly integrate our work style into our client's operations. This has been one of the keys to our growth and why clients repeatedly choose FYM Logic, Inc. as their trusted electrical contracting partner.

At FYM Logic, we provide service with honesty and integrity, no matter how big or small the project. On every project FYM Logic strives to provide our clients with service in a timely and cost effective manner. In order to accomplish this we believe it is important to form a close and long lasting relationship with our clients.

Skilled Training

We pride ourselves on providing highly skilled electricians who are trained in all facets of electrical contracting. A key advantage to being a member of IBEW Local #43 is the fact that our workforce receives ongoing training and in an ever changing industry, this is vital to our clients needs.

Safety

FYM Logic, Inc. is committed to safety, health and environmental regulations. It is our goal to complete all projects in an efficient, productive manner that incorporates safe work processes and strong safety awareness.

Our crews sometimes work under unusual and challenging situations. That's why FYM Logic, Inc. places the highest importance on the safety and health of our employees. We believe that the only way our firm can provide the high quality product our customers expect is to provide them with a highly trained workforce, and an extremely safe working environment.

In an effort to ensure that each workplace is safe, we have implemented many policies and procedures that focus on safety. Some things we do in our commitment to safety are: weekly toolbox safety meetings on our jobsites, new hire safety orientations, and updated safety manual as needed. Furthermore, we have policies against unsafe acts that ensure all employees understand the importance of safety – for them and their loved ones.

Ultimately, achieving Zero Accidents is the most important objective in our work culture.

Client List

FYM Logic, Inc. has earned a reputation in the industry for consistent delivery of quality and professional construction services. The truest testament of our abilities is realized with the long-term partnerships we consistently forge with our clients. A representative sample of our clients includes:

Management Team

FYM Logic, Inc. is structured to effectively and efficiently respond to the needs of our clients. The company's day-to-day operations are led by a strong management team who take our business and that of our clients very serious.

Yolanda Mitchell – President

Yolanda, as owner of FYM Logic, Inc., is the visionary for the organization. With her educational background in Electrical Engineering, she gives practical guidance to the day-to-day operations. Responsibilities include, managing the field to office operations, office staff, human resources, project planning, bookkeeping, and correspondences to keep the business sound.

Floyd Mitchell – General Manager

Floyd's responsibilities include managing all aspects of the field operations, estimating and bidding. He has fifteen years experience as a union electrician. He holds a Master Electricians License for the City of Syracuse. He has a wide range of knowledge in

the industry of electrical technology. This includes (but not limited to) fire alarms, security, new services, re-wiring, motor controls, lighting, receptacles, and grounding.

Steven Coker – Operations & Marketing Manager

Steven's responsibilities include managing front-end and back-end documents, managing day-to-day operations on client projects, strategic planning and marketing the company to existing and new clients. Steven received his Bachelor's degree from Wagner College and his Juris Doctorate from Nova Southeastern University.

The FYM LOGIC, INC. Advantage

Today, clients are challenged with increasingly complicated projects and limited resources. FYM Logic, Inc. is committed to helping our clients overcome these challenges by augmenting the client's resources with innovative solutions and a talented team of professionals.

Clients realize the benefits of entrusting their projects to FYM Logic, Inc.

- Quality workmanship which is delivered on time and within budget
- Field operations proceed smoothly and safely through integrated planning and resource management
- Accurate measures of progress are provided through timely budget and schedule status reports
- Potential claims are avoided through explicit contracts and detailed documentation

- Clients realize “peace of mind” with a representation that protects their interest throughout each project and its implementation

Our front-end staff and field staff provide specialized knowledge, experience and training to navigate through the complexities of a construction project. By providing the resources and expertise needed to manage quality, cost, schedule, scope and risks associated with construction, we help our clients achieve their objectives.
